

DEZSYS-04

"INTERPROZESSKOMMUNIKATION"

KnockKnock Beispiel lokal ausführen

- Quelldateien vom Oracle Tutorial herunterladen und in Eclipse importieren.
- RunConfiguration mit Parametern in Eclipse erstellen.
- Ausführen und freuen.

Tesfall

```
Server: Knock! Knock!  
Hallo du  
Client: Hallo du  
Server: You're supposed to say "Who's there?"! Try again. Knock! Knock!  
Who's there?  
Client: Who's there?  
Server: Turnip  
Turnip who?  
Client: Turnip who?  
Server: Turnip the heat, it's cold in here! Want another? (y/n)  
y  
Client: y  
Server: Knock! Knock!  
Who's there?  
Client: Who's there?  
Server: Little Old Lady  
Little Old Lady who?  
Client: Little Old Lady who?  
Server: I didn't know you could yodel! Want another? (y/n)  
n  
Client: n  
Server: Bye.
```
